## **How to register CallGuard**

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

## **How to install CallGuard**

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that follow the installation instructions on the mobile screen.

## **Working with CallGuard**

### ***How to start***

CallGuard Application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → CallGuard
- Clicking on the Menu button → My Own/Programs → CallGuard

### ***General information***

CallGuard application allows you to manage and to control your incoming calls. This application mutes, rejects your incoming calls and sends the SMS message to the contact number, who was calling you. Now there is no need to mute the phone, if you have a meeting and is waiting for the important call. You need to create the white list and all the calls will be muted or rejected (it depends on your settings) except one you are waiting for.

### ***First Application Start***

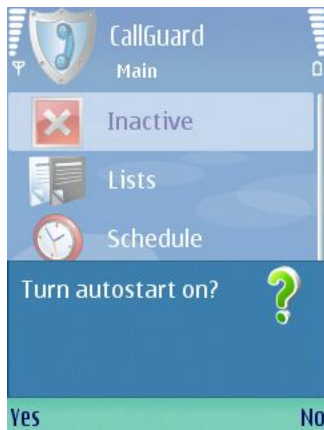

At first application start you will be shown the message to activate the Autostart or to turn it Off. You will be able to change this options also in the software settings afterwards.

SymbianGuru.com Your guru in mobile software.

[www.symbianguru.com](http://www.symbianguru.com)

[support@symbianguru.com](mailto:support@symbianguru.com)

At first application start the software will be turned off. The main application screen has the following view:

- **Active/Inactive** – shows you the current state of the software: Active – the software is activated, Inactive- the software is deactivated
- **Lists** – shows you the available Black and White Lists created
- **Schedules** – contains the list of Schedules created according to the white and black lists present

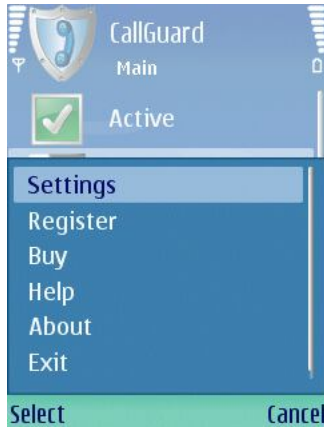

When you press CallGuard left soft key Options you will receive the following list of settings:

SymbianGuru.com Your guru in mobile software.

[www.symbianguru.com](http://www.symbianguru.com)

[support@symbianguru.com](mailto:support@symbianguru.com)

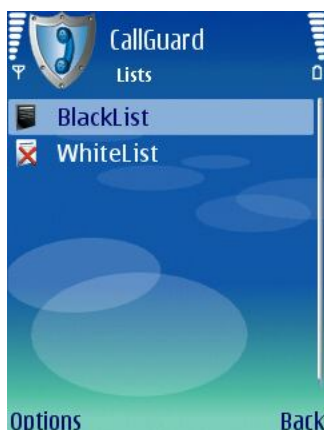

- Settings – option where you can modify Settings' fields
- Register – to enter registration code
- Help – contains all necessary information for navigation across the application
- About – contains brief information about the SymbianGuru
- Exit – exits the application

### ***CallGuard Lists***

This menu items allows you to manage your Black and White lists created.

When you first enter this menu item you will receive two lists available with no contacts inside.

In order to manage or edit the current list you need to press the left soft key Options and you will be able to:

1. *Activate/Deactivate* - allows you to activate/deactivate the list selected

SymbianGuru.com Your guru in mobile software.

[www.symbianguru.com](http://www.symbianguru.com)

[support@symbianguru.com](mailto:support@symbianguru.com)

2. *Edit Numbers* – allow you to edit the numbers present in this list
3. *Edit* – allows you to edit the settings (type, name, reject action) of the list selected
4. *New* – allows you to create new black or white list
5. *Delete* – delete the list selected

### Create New list

If you want to create the new list you need to enter the software, enter Lists menu, press Options – New and fill the following:

- *Name* – you need to name the list created, for example, you can name the list according to the numbers present in this list – Family, Work, Friends etc.
- *Type* – here you should define the type of the list – it can be Black or White list (to change the type you need to press the Fire button once)
- *Phone Numbers* – here you can add numbers which should be present in this list. When you enter the Phone Numbers item for the first time you will receive the 'No data' message with no numbers present. If you want to add some numbers you should press Options and will need to select which contact or/and group or/and number should be added or add the unknown or/and private numbers.

[support@symbianguru.com](mailto:support@symbianguru.com)

- *Reject action* – Busy/Mute ringing/Busy&SMS - here you should define the action which will be happen when one of the contact number, present in the list, will be calling you.

The number of lists is unlimited, but the number of active list is limited to one. It means that only one list can be activated.

**Note!** You can deactivate all lists present, but the software will automatically activate the last one, which was activated with the help of Schedule till up to now.

[www.symbianguru.com](http://www.symbianguru.com)

[support@symbianguru.com](mailto:support@symbianguru.com)

- Condition - here you should select the condition of your schedule – how often this schedule should be activated

1. *Once*
2. *Daily or weekdays*
3. *Monthly*

- Activation date/Weekdays/Day of month – this menu item depends on what you have selected previously. In case you select Once you need also to define the Activation Date. In case you select the Daily or Weekdays condition you should define the Weekdays when this schedule will be activated. In case you select Monthly condition, you will need to enter the Day of month when this schedule will be activated.

- Activation time – here you should define the activation time of the created schedule
