Index

General description

Call Recorder Software allows automatic recording of voice calls. It's a perfect tool to save the records of the phone calls and to play them in high quality. The software shows both recordings and rules information in comfortable tab screens.

Version 1.1 Call Recorder is compatible with **S60 5th Edition and Symbian^3** touch screen phones:

Nokia 5230	Nokia N97 mini
Nokia 5228	Nokia X6-00
Nokia 5235	Nokia N8-00
Nokia 5230 Nuron	Nokia C7-00
Nokia 5250	Nokia E7-00
Nokia 5530 XpressMusic	Nokia C6-01
Nokia 5800 XpressMusic	Nokia C7 Astound
Nokia C5-03	Nokia X7-00
Nokia C6-00	Nokia E6-00
Nokia N97	
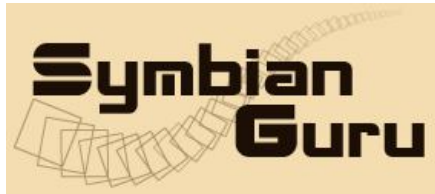

How to register Call Recorder

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

How to install Call Recorder

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that follow the installation instructions on the mobile screen.

## Working with Call Recorder

How to start

Call Recorder Application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → Applications → Call Recorder
- Clicking on the Menu button → Applications → Install apps.→ Call Recorder

General information

Call Recorder application is meant to save your phone conversations for incoming and outgoing calls. This is fully customizable call recording software with rules which allows automating call recording for different phone numbers and calling directions. If you create/accept a call, you will be asked whether to record the call or not in case you have set [Ask before record] action to the rule. Also according to the rules previously set in the Rules tab, the call could be automatically recorded without asking.
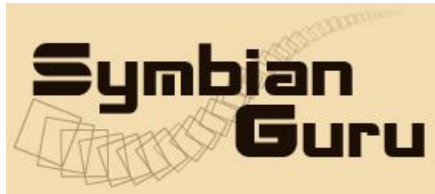

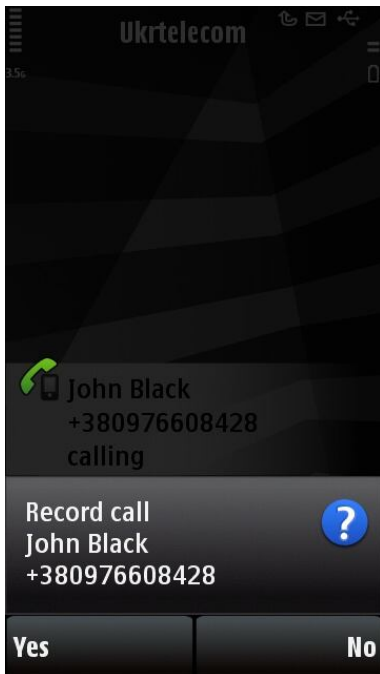

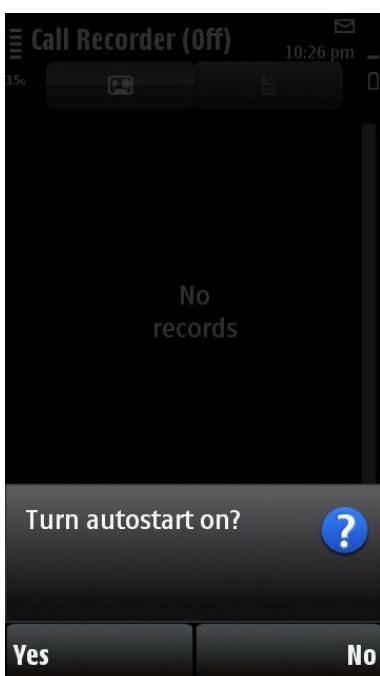

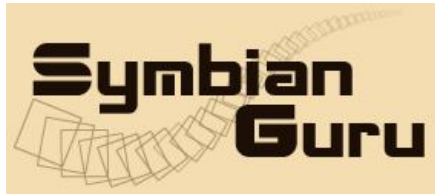

Application start

At first application start you will be prompted to turn the Autostart option On. This means that application will be started every time the phone starts, so you will not have to start it manually each time. You will be able to change this option when choosing the Settings button.
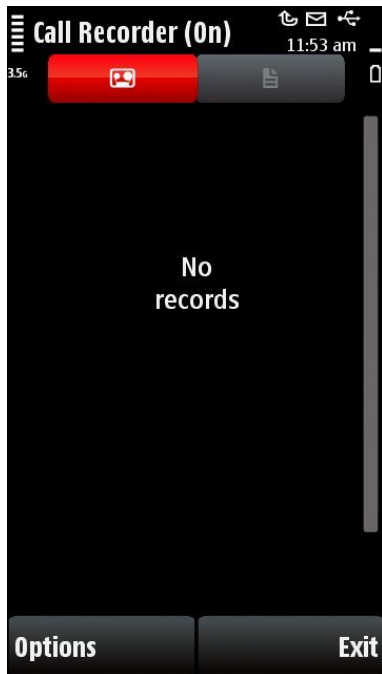

Opening the application for the first time you can see the main screen with the -no records- text on it.

Note! Call Recorder application is disabled by default. To start using the application you have to activate Call Recorder. Please click left soft key Options and configure the Active button to On.

Application Tabs

The main application screen displays two tabs – Records and Rules.

Records

All recorded conversations are listed in the Records tab:
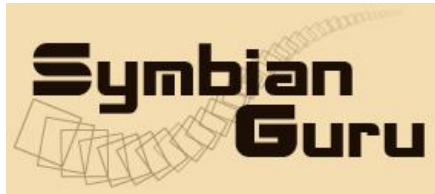

The incoming calls are marked by a blue arrow and the outgoing by a green one. Also each record contains such information as date/time of recording, record duration and belonging to the contact/group.

To play record you need to select the current record and tap [image] the Play button. To pause playing just tap on the Pause button [image] and to stop playing tap on the Stop button [image]. To see the record's details just tap on the Properties button [image]. You will be shown the following information:
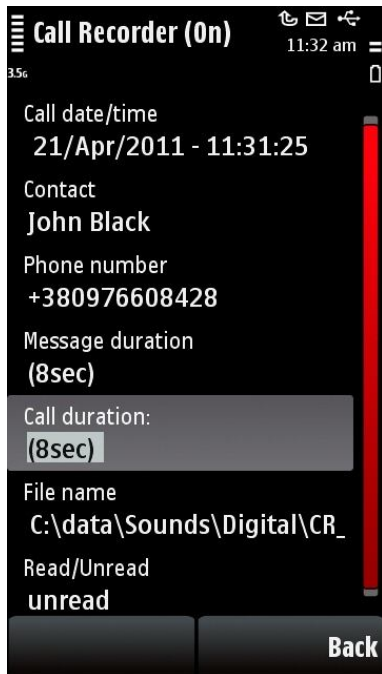

- Call date/time – time of call recording
- Contact – related to the record contact
- Phone number
- Message duration
- Call duration
- File name – path on the device where record is stored
- Read/Unread – mark if the record has already played or not
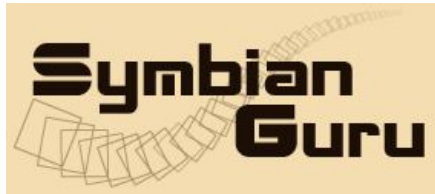

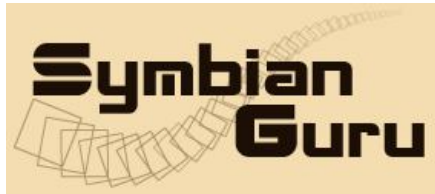

Rules

Here user is able to set the rules which are applied to the contacts. To create the new rule you have to click left soft key Options. The main screen already contains two predefined rules – Default and Unknown phone:
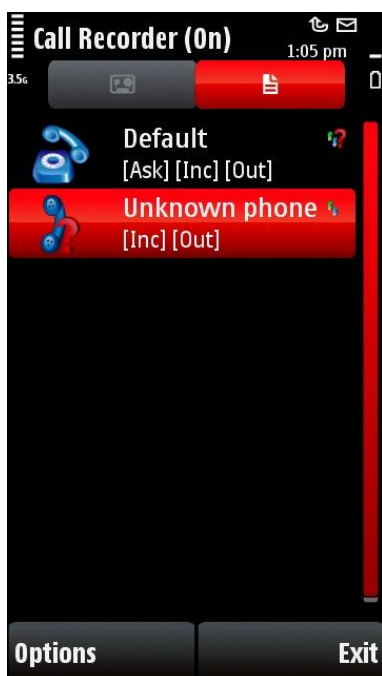

Default rule will be activated if none of the active rules is used. Unknown number rule is used if the incoming number isn't defined

There are the following items in Options menu:

- Set action – you can set an action for every rule:
- Add contact – you can set a separate rule for a specific contact
- Add group – a rule for a group of contacts
- Add phone – a rule for a phone number (you can use a mask for phone numbers; a match pattern can contain wildcard characters "*" and "?", where "*" matches zero or more consecutive presences of any character, and "?" matches a single presence of any character)
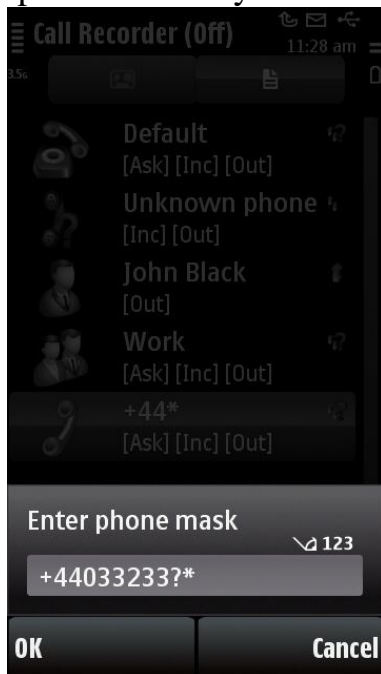

- Edit – user is able to edit
- Delete – allows to delete the current rule
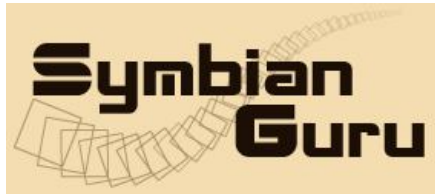

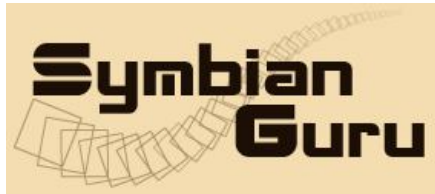

After creating at least one rule the screen has the following view:

You can set Actions for the current rule. To do this please click left soft key Options and choose Set action:

There are the following actions available:

- Ask before record – if this action is selected, Call Recorder will ask whether the phone call should be recorded or not
- Record incoming – record of all incoming calls is allowed
- Record outgoing – record of all outgoing calls is allowed

Note! If you haven't chosen a single action for the rule or have chosen only Ask before record, this rule will be disabled.

Application Options

When you press left soft key Options you will receive the following list of settings:

- Call – allows to call the number of the current record
- Send via – select the method to send the recorded file
  - o Send via Infrared
  - o Send via Bluetooth
  - o Send via e-mail
  - o Send via MMS
- Delete – remove the current record or all records
- Settings – option where you can modify Settings' fields
- Register – to enter registration code
- Buy – opens Internet connection to purchase the software online
- About – contains brief information about the SymbianGuru
- Help – contains all necessary information for navigation across the application
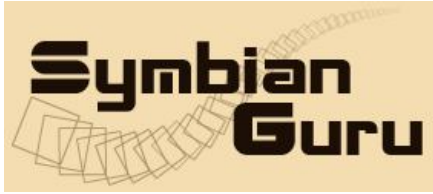

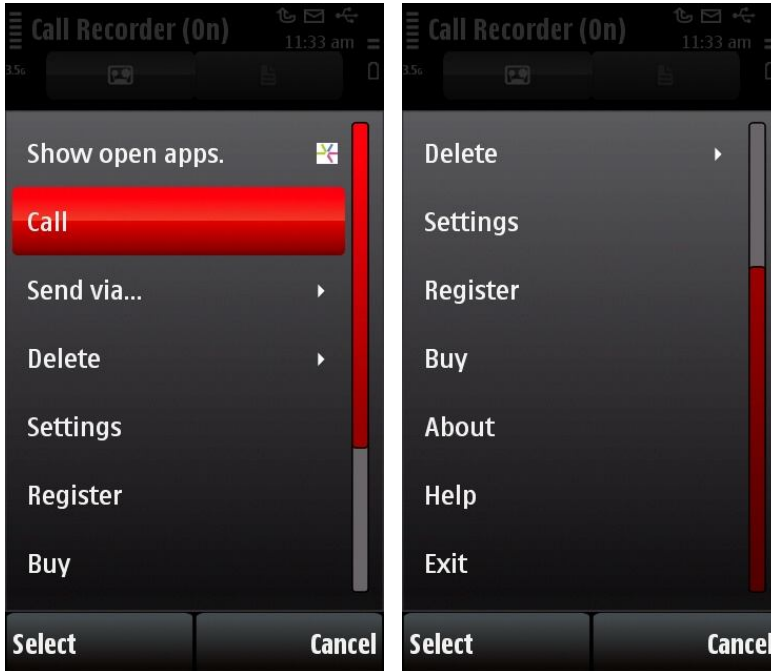

- Exit – exits the application

Call Recorder Settings

To access the Call Recorder Settings you should press left soft key Options -> Settings
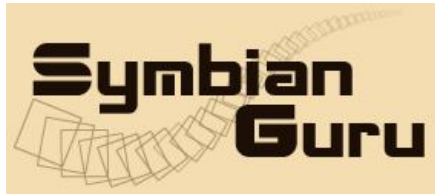

SymbianGuru.com Your guru in mobile software.
www.symbianguru.com

support@symbianguru.com

The settings of the Call Recorder software contain following items:
