How to register SMS Alert

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

You can also buy the software directly from your mobile phone using your credit card. To buy the software you should press Options – Buy and follow the instructions.

How to install SMS Alert

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that, follow the installation instructions on the mobile screen. You can install SMS Alert either on your phone memory or on the MMC.

Working with SMS Alert

How to start

SMS Alert Application can be opened in following ways (depending on the phone):

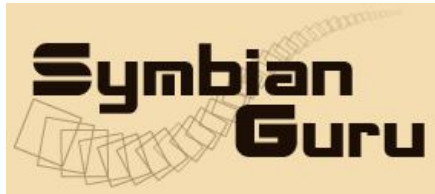

- Clicking on the Menu button → SMS Alert
- Clicking on the Menu button → My Own/Programs → SMS Alert

General information

SMS Alert application is meant to assign the different alerts to a proper contact, group of contacts or profile. The tone chosen by you will be played when you receive SMS from certain contact or group. Additionally, you can also manage the Nokia profile SMS alerts in the SMS Alert application.

First Application Start

At first application start you will be shown the message to activate the Autostart or to turn it Off. You will be able to change this option also in the software settings afterwards.

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

It is recommended that you turn the Autostart on, so SMS Alert will be booted together with your phone and you will not forget to turn it on.

Create new SMS alert

At first application start you will have no data on the main screen of the software.

You need to define contacts and their unique SMS alerts.

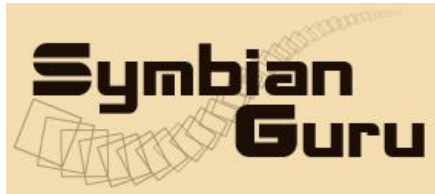

To create a new SMS alert for a contact or a group you have to choose Options →

New or tap New button  .

Note! In Profiles there must be at least one profile active, otherwise you won't be able to create new SMS alert.

You should fill in the following fields in order to create new SMS alert:

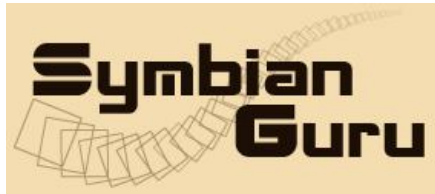

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

- **Message tone** - from a drop-down list of tones you must choose one
- **Assign to** - is set to assign the chosen tone for a contact or group of contacts.
 1. Choosing contact you can see the list of the contacts, from which you can with multiple selection choose contacts that he will assign the tone to.
 2. Choosing group of contacts you can see the list of groups, from which you can choose only one that he will assign the tone to.
- **Ringing volume** - the level of volume is set for each message tone
- **Ringing type** - the way the tone will ring; there are such types as:
 1. *Ringing*
 2. *Ascending*
 3. *Ring once*
 4. *Beep once*
 5. *Silent*

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

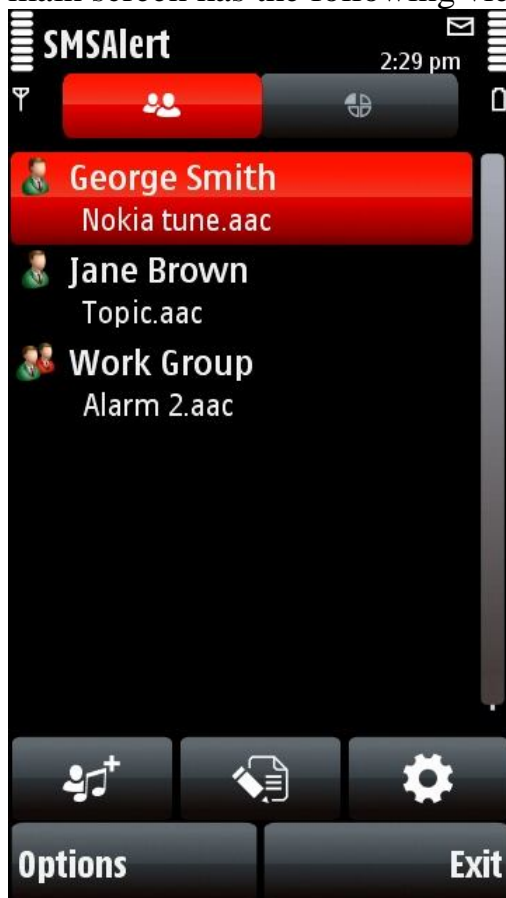

Example: You would like receive messages from John with the sound XXX. To achieve this you have to:

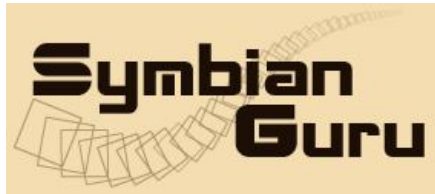

- Choose the sound XXX from the list of tones at the 'Message tones' field
- Select 'Assign to' field and you will have the opportunity to choose Contact or Group
- Select John from the list of contacts and press 'Ok'
- Set up the ringing volume at the 'Ringing volume' field
- Choose the ringing type
- After pressing 'Ok' all changes will be saved

To edit already existing SMS alert you have to choose Options → Edit in the Profiles inset or tap Edit button .

Existing SMS alerts

If there are records, you see a list of records. In this case the Contacts inset of the main screen has the following view:

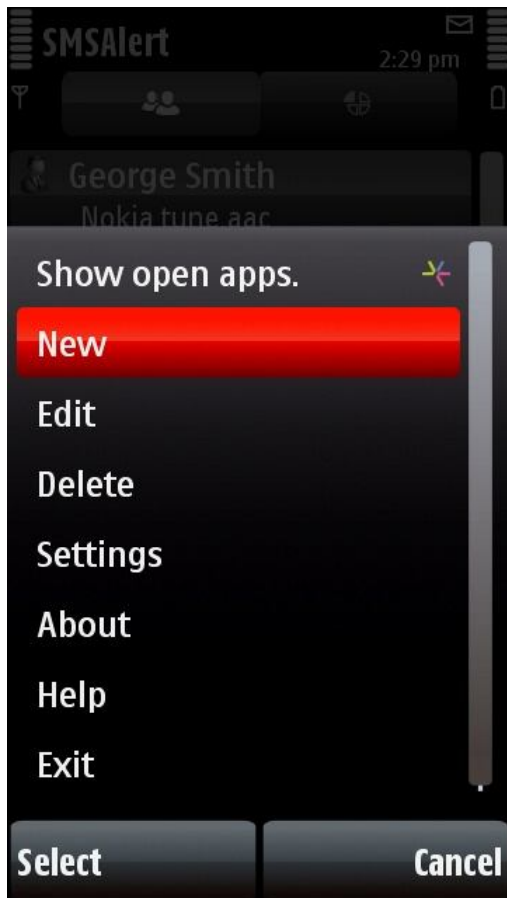

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

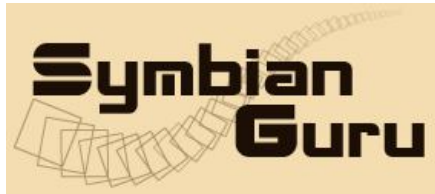

support@symbianguru.com

- New - creating of new SMS Alert record
- Edit - editing of existed SMS Alert record, you have just to correct previously fulfilled fields
- Settings - allows editing the application settings
- About - contains brief information about company and contacts
- Help - contains short info for user how to use the software
- Exit - exits the application

Profiles Tab

When you enter the Profiles tab, you can see the list of profiles.

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

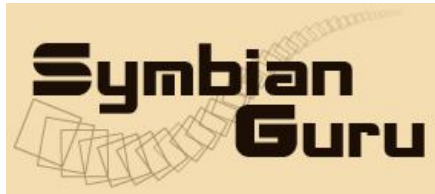

In the process of working with SMS Alert you can change SMS alert sounds for each existing profile, and select profiles, on which the software will be activated.

You can deactivate the profiles from the list. In this case the SMS alert will not work when your mobile has this profile activated.

To activate the profile you have to choose Options → Activate or tap Activate button .

To deactivate the profile you have to choose Options → Deactivate or tap Deactivate button .

Attention: if you make any changes manually in the Nokia native profile, these changes may affect SMS Alert functionality. So if you use SMS Alert it is better to make all changes in Profiles tab inside the SMS Alert application.

Editing profile SMS alert

To edit a profile SMS alert you have to choose Options → Edit in the Profiles inset or tap Edit button .

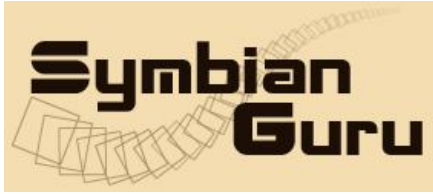

The alert you choose here will be played when the profile is activated.

Note! SMS alert for a Contact has bigger priority then SMS alert for a profile!

You should fill in the following fields:

- **Message tone** - from a drop-down list of tones you must choose one
- **Ringing volume** – you should set the level of volume for each message tone
- **Ringing type** - the way the tone will ring; there are such types as:
 1. *Ringing*
